Case Study 6: Online Shopping Website

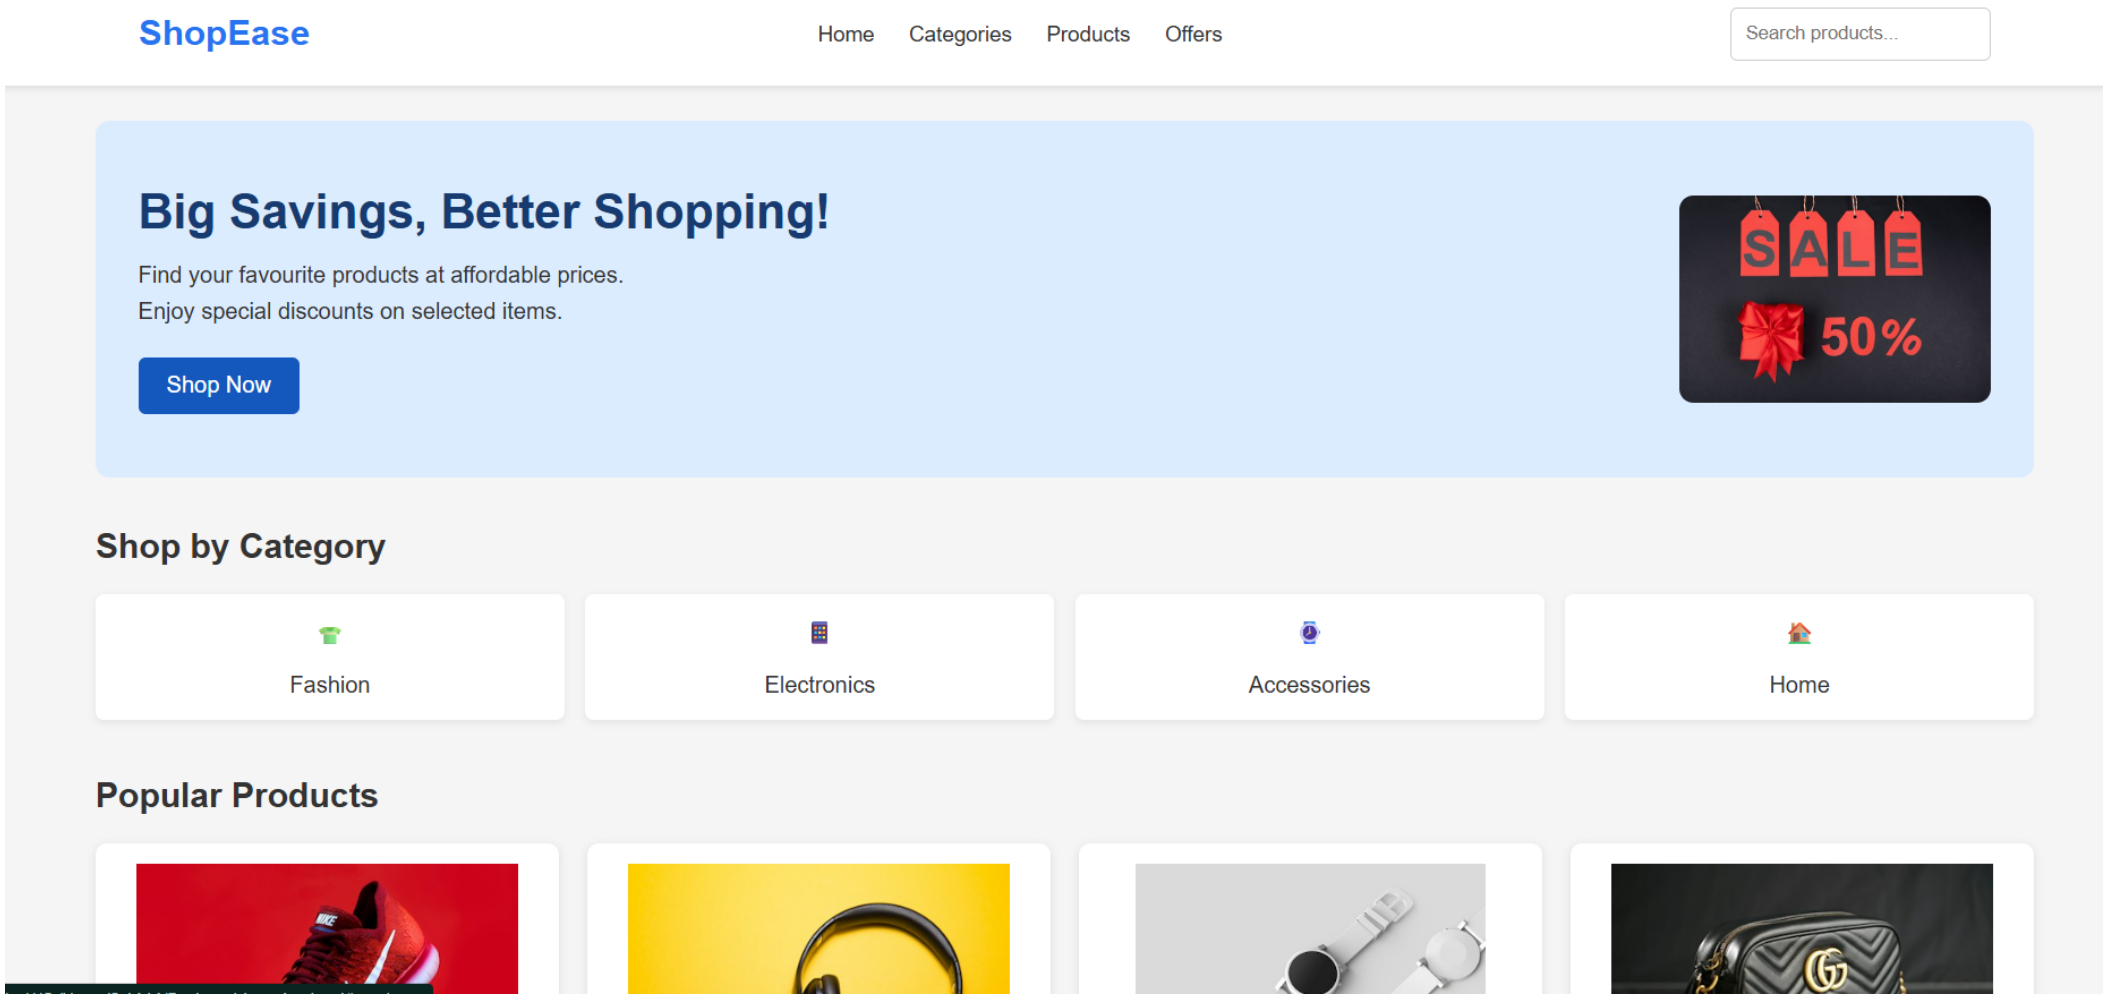

An online shopping website allows customers to browse products, compare prices, check ratings and discounts, and explore different categories from one place. The interface includes a navigation bar, promotional banner, responsive product grid, product descriptions and shopping buttons. A real e-commerce system can extend this design with search, cart, payment and order-tracking features.

Main features

• Product categories and product cards
• Price, discount and customer rating display
• Promotional offers and responsive layout
• Shopping buttons and clear navigation
